

NEW BOOKS IN MATHEMATICS – MAY 2008

Title	Author/ Editor	Year published	Call Number	Location
Asset pricing : modeling and estimation	Kellerhals, B. Philipp.	2004	519.86 KEL	Mathematics Library
A basic course in algebraic topology	Massey, William S.	1991	515.14 MAS	Mathematics Library
A benchmark approach to quantitative finance	Platen, Eckhard.	2006	519.86 PLA	Mathematics Library
Binomial models in finance	Van der Hoek, John., Elliott, Robert J.	2006	519.86 VAN	Mathematics Library
Controlled Markov processes and viscosity solutions	Fleming, Wendell Helms., Soner, H. Mete.	2006	519.217 FLE	Mathematics Library
A course in derivative securities : introduction to theory and computation	Back, K.	2005	519.86 BAC	Mathematics Library
Credit risk pricing models : theory and practice	Schmid, Bernd.	2004	Processing	Mathematics Library
Creditrisk+ in the banking industry	Gundlach, Matthias., Lehrbass, Frank.	2004	519.86 CRE	Mathematics Library
Derivative securities and difference methods	Zhu, You-lan., Wu, Xiaonan., Chern, I- Liang.	2004	519.86 ZHU	Mathematics Library
Discrete-time Markov control processes : basic optimality criteria	Herná Index-Lerma., Lasserre, Jean- Bernard.	1996	519.217 HER	Mathematics Library
Electrodynamics of particles and plasmas	Clemmow, P. C., Dougherty, J. P.	1990	533.9 CLE	Mathematics Library
Elementary survey sampling	Scheaffer, Richard L., Mendenhall, William., Ott, Lyman.	2006	519.253 SCH	Mathematics Library
Empirical techniques in finance	Bhar, Ramaprasad., Hamori, Shigeyuki.	2005	519.86 BHA	Mathematics Library
The Fermi-Pasta-Ulam problem : a status report	Gallavotti, Giovanni.	2008	517.93 FER	Mathematics Library
The fourth Janko group	Ivanov, A. A.	2004	512.54 IVA	Mathematics Library

Functional analysis	Lax, Peter D.	2002	517.98 LAX	Mathematics Library
Fundamentals of clinical trials	Friedman, Lawrence M., Furberg, Curt D., DeMets, David L.	1998	519.24.61 FRI	Mathematics Library
Further topics on discrete-time Markov control processes	Herna' Indez-Lerma., Lasserre, Jean-Bernard.	1999	519.217 HER	Mathematics Library
A game theory analysis of options : corporate finance and financial intermediation in continuous time	Ziegler, Alexandre.	2004	519.86 ZIE	Mathematics Library
Geometric mechanics : towards a unification of classical physics	Talman, Richard.	2007	530.1M TAL	Mathematics Library
Geometry from a differentiable viewpoint	McCleary, John.	1997	514 MCC	Mathematics Library
The geometry of four-manifolds	Donaldson, S. K., Kronheimer, P. B.	1997	514.76 DON	Mathematics Library
Hidden Markov models : estimation and control	Elliott, Robert James., Aggoun, Lakhdar., Moore, John B.	1997	519.246.8 ELL	Mathematics Library
Implementing models in quantitative finance: methods and cases	Fusai, Gianluca., Roncoroni, Andrea.	2007	519.86 FUS	Mathematics Library
Incomplete information and heterogeneous beliefs in continuous-time finance	Ziegler, Alexandre.	2003	519.86 ZIE	Mathematics Library
An initiation to logarithmic Sobolev inequalities	Royer, Gilles.	2007	517.982.22 ROY	Mathematics Library
Interest rate models : an infinite dimensional stochastic analysis perspective	Carmona, R., Tehranchi, Michael.	2006	519.86 CAR	Mathematics Library
Intermediate probability : a computational approach	Paoletta, Marc S.	2007	519.21 PAO	Mathematics Library
Introduction to coding theory	Lint, Jacobus Hendricus van.	1999	519.72 VAN	Mathematics Library
Introduction to dynamical systems	Brin, Michael., Stuck, Garrett.	2002	517.93 BRI	Mathematics Library
An introduction to financial option valuation : mathematics, stochastics, and computation	Higham, D. J.	2004	519.86 HIG	Mathematics Library
Introduction to mathematical statistics	Hogg, Robert V., McKean, Joseph W., Craig, Allen Thornton.	2005	519.22 HOG	Mathematics Library
Introduction to modular forms	Lang, Serge.	1976	511.334 LAN	Mathematics Library
An introduction to the Heisenberg Group and the sub-Riemannian isoperimetric problem	Capogna, Luca.	2007	514.76 INT	Mathematics Library
Introductory quantum mechanics	Liboff, Richard L.	2003	530.1M0 LIB	Mathematics Library
Irrational exuberance reconsidered : the cross section of stock returns	Kullpmann, Mathias	2004	519.86 KUL	Mathematics Library
Kolmogorov's heritage in mathematics	Kolmogorov, A. N.	2007	92 KOL	Mathematics Library
Mathematical finance--Bachelier Congress, 2000 : selected papers from the First World Congress of the Bachelier Finance Society, Paris, June 29-July 1, 2000	Geman, Helyette.	2002	519.86 BAC	Mathematics Library
Mathematical models in biology	Edelstein-Keshet, Leah.	2005	51.76 EDE	Mathematics Library
Measure, integral and probability	Capinski, Marek., Kopp, P. E.	2004	517.518.1 CAP	Mathematics Library
Number theory : an approach through history from Hammurapi to Legendre	Weil, André	2007	511 WEI	Mathematics Library

Numerical methods in finance and economics : a MATLAB-based introduction	Brandimarte, Paolo.	2006	519.2.86 BRA	Mathematics Library
Optimal stopping rules	Shiryayev, A. N.	2007	519.244.3 SHI	Mathematics Library
The Riemann hypothesis : a resource for the aficionado and virtuoso alike	Borwein, Peter B.	2008	517.545 RIE	Mathematics Library
Robust portfolio optimization and management	Fabozzi, Frank J.	2007	519.86 ROB	Mathematics Library
Schaum's outline of theory and problems of plane and solid analytic geometry	Kindle, Joseph H.	1950	514.12 KIN	Mathematics Library
A second course in probability	Ross, Sheldon M., Peköz, Erol A.	2007	519.21 ROS	Mathematics Library
Semiparametric modeling of implied volatility	Fengler, Matthias R.	2005	519.233.5 FEN	Mathematics Library
Statistical methods for survival data analysis	Lee, Elisa T.	2003	519.283 LEE	Mathematics Library
Stochastic approximation and recursive algorithms and applications	Kushner, Harold J., Yin, George.	2003	519.217 KUS	Mathematics Library
Stochastic calculus for finance I : the binomial asset pricing model	Shreve, Steven E.	2004	519.216 SHR	Mathematics Library
Stochastic calculus for finance II : continuous-time models	Shreve, Steven E.	2004	519.216 SHR	Mathematics Library
Stochastic calculus of variations in mathematical finance	Malliavin, Paul.	2006	519.216 MAL	Mathematics Library
Stochastic controls : Hamiltonian systems and HJB equations	Yong, J., Zhou, Xun Yu.	1999	519.217 YON	Mathematics Library
Stochastic portfolio theory	Fernholz, Erhard Robert.	2002	519.217 FER	Mathematics Library
Stochastic simulation : alorithms and analysis	Asmussen, Søren.	2007	519.216 ASM	Mathematics Library
Stratified Lie groups and potential theory for their sub-Laplacians	Bonfiglioli, Andrea., Lanconelli, E., Uguzzoni, F.	2007	512.81 BON	Mathematics Library
Sub-Laplacians with drift on Lie groups of polynomial volume growth	Alexopoulos, Georgios K.	2002	512.81 ALE	Mathematics Library
Survival analysis : a self-learning text	Kleinbaum, David G., Klein, Mitchel.	2005	519.243 KLE	Mathematics Library
Symmetry rules : how science and nature are founded on symmetry	Rosen, Joe.	2008	530.1 ROS	Mathematics Library
Tools for computational finance	Seydel, R.	2006	519.86 SEY	Mathematics Library
Uncertain volatility models : theory and applications	Buff, Robert.	2002	519.86 BUF	Mathematics Library
Visual explorations in finance : with self-organizing maps	Deboeck, Guido J., Kohonen, Teuvo.	1998	519.86 VIS	Mathematics Library
Weak convergence of financial markets	Prigent, Jean-Luc.	2003	519.86 PRI	Mathematics Library
Chance : the life of games and the game of life	Sa, J. P. Marques de.	2008	519.21 SA	Central Library Level 2 Physical Sciences & Engineering book collection
Probability models	Haigh, John, Dr.	2002	519.2 HAI	Central Library Level 2 Physical Sciences & Engineering book collection
Sample survey : principles & methods	Barnett, Vic.	2002	519.253 BAR	Central Library Level 2 Physical Sciences & Engineering book collection
